

Celebrating the arrival of the silos and nutritious food for school children in Karansi.

UBORA

IMPACT PROGRAM

Community

Uborat believes that all members of a society have valuable things to offer and as such, should be treated with respect and love. Community-led initiatives provide opportunities to share Biblical truth to children and parents, to meet physical needs throughout the district, and to create a feeling of worth in all people in the Siha District of Tanzania.

OUR INTENTION

The Community Impact Program seeks to provide creative solutions for the issues stemming from the effects of illiteracy, flooding and drought, minimal access to Biblical teaching, and harmful tribal customs.

OUR INSPIRATION

Protecting a 10 year old girl from being given in marriage...Providing 3200 children with one meal a day at school...Watching a child hold a book for the very first time...Caring for a widow. These are the things that drive the Community Impact Program to champion those in need.

OUR IMPACT

- 35 homes built for widows
- 600 children each summer attend Vacation Bible School; 2,500 children total served
- Seven food silos delivered to local schools and the village holding enough maize for 800,000 meals
- 25,000 books delivered to Tanzania
- Established the first community library in a rural village with a popular reading program for young children
- Second community library in neighboring village under construction in 2021; duplicating the reading program there
- Working to end the violation of young girls walking home long distances from secondary school
- Programs for fellowship, worship, and care for 73 village widows
